

9 May 1957

Director of Logistics

Assistant Director for Basic Intelligence

NIS Printing Requirements for Fiscal Year 1958  
and Fiscal Year 1959

1. It has been the responsibility of the Office of Basic Intelligence in the past to budget for the cost of printing the National Intelligence Survey at the State Service Office of the Government Printing Office. With the integration of this printing plant into the Printing Services Division, Office of Logistics, this no longer is necessary and the Comptroller's office has requested that OBI carry no funds for NIS printing in its future budgets, beginning with the Fiscal Year 1958 Operating Budget. It is understood that the Printing Services Division will henceforth request sufficient funds for NIS printing and printing supplies each fiscal year based on requirements indicated by this Office.

2. The Office of Basic Intelligence will require in Fiscal Year 1958 printing services and supplies sufficient to accomplish production of the following:

- a. 550 NIS sections, totaling approximately 72,000 folios of manuscript, graphic, and map material
- b. 13 standard base maps
- c. 13 page-size base maps
- d. 15 standard base map re-runs
- e. 280 maps for color proofing
- f. 240 miscellaneous printing items such as positives, binders, type orders, silver prints, reprints of NIS sections, map screens, color separation of maps, reproduction proofs, NIS Quarterly Production Report, NIS Annual Report, etc.

3. The requirement for printing services and supplies in Fiscal Year 1959 is identical to that for Fiscal Year 1958.
